JAKE SCHNEIDER

(973) 787-4254   jakemschneider92@gmail.com   js4484.github.io   LinkedIn   Github

SKILLS   JavaScript, Ruby, Rails, React, PostgreSQL, GraphQL, MongoDB, Express, Node, Adobe Creative Suite

PROJECTS

ArtWalk *(React / Redux, JS, Ruby / Rails, PostgreSQL, jQuery, HTML / CSS)*   **live** | **github**
 -- Designed and realized fully scalable single-page website from conception to content with Ruby on Rails, PostgreSQL,
   jQuery, and jBuilder enabling users to book art tours throughout New York City.
 -- Secured visitor privacy with front-end and back-end protection like BCrypt and dynamic modals to ensure that only
   logged-in users could reserve tickets.
 -- Constructed responsive and user-focused experiences with React / Redux, HTML, and CSS to normalize and present
   database information

Netflex *(React, JS, MongoDB, Express, Node, GraphQL, HTML / CSS)*   **live** | **github**
 -- Built user authorization and protection with BCrypt and React Router so only registered users can progress past the
   splash page and access the video or user data
 -- Styled exciting, responsive pages with React, JavaScript, CSS animations, flexbox, and Adobe Creative Suite
 -- Seeded and normalized MongoDB database with Postman to facilitate scalable rendering

Exo Store *(React, JS, MongoDB, Express, Node, GraphQL, Apollo, HTML / CSS)*   **live** | **github**
 -- Leveraged several APIs with Axios, GraphQL, MongoDB, and custom algorithms to build a database for an Etsy-inspired
   extra-stellar-facing marketplace
 -- Built out dynamic, responsive, scalable components with React, Apollo, JavaScript, and CSS, so visitors can explore
   products as a whole, and more in depth; specialized product detail pages by category
 -- Implemented site-wide styling with animations, advanced combinators, and flexbox for exciting, malleable pages

MetData *(React, JS, MongoDB, Express, Node, GraphQL, Axios, HTML / CSS)*   **live** | **github**
 -- Utilized the Met's API, MongoDB, Axios, GraphQL, and a custom algorithm to build a semi-random sample set of about
   2,000 items down from 470,000
 -- Analyzed this data to create statistical insights about the collection, and presented them using JavaScript, React,
   recharts, animations, and flexbox techniques so the page may adjust to various screens

EXPERIENCE

Bartender
Columbia Bartending Agency   Nov 2014 - May 2016
 -- Interfaced with guests and supported catering staff for private events ranging in attendance from 30 to 200 guests
 -- Collaborated with clients to make a custom drink menus and party plans ranging from law offices to private homes

Intern
PACE/MacGill Gallery   May 2015 - Aug 2015
 -- Ensured safe handling of works valued up to $250,000 through use of archival materials and proper safety practices
 -- Processed art for sending and receiving through condition reports, registrarial work, and shipping preparation
 -- Conducted research on artists and clients in order to promote synergy, maximize sales, and open new selling channels

EDUCATION

Columbia University BA Art History 2016: *Cum Laude, Lifchez-Stronach Scholarship*
AppAcademy 2020: *1000hr immersive full-stack web development course designed around TDD, scalability, algorithms,*
   OOP, REST-ful conventions, single-page apps, and web development best practices
